Dr. and Mrs. Sample

Purpose: To describe and document the quality of the jewelry listed and to estimate its Approximate Replacement Cost.

Function: To provide a basis for obtaining insurance coverage.

Location of Examination

The office of Mark Gamel GG CSM

Ownership

The report did not discover liens, encumbrances, or fractional interests.

Legal Proceedings

Any legal proceeds from this appraisal will require additional fees.

Restrictions of Use

Not part of this appraisal may be published or used for any purpose than stated in the purpose and function.

Confidentiality

The report is confidential between Dr. and Mrs. Sample and myself. I have no interest or perceived interest in this appraisal.

Methods of Replacement

New replacement, replacement with a comparable, and new reproduction. The most appropriate method is new replacement or replacement with a comparable.

Market

The most appropriate market for replacement is the Retail Jewelry Store.

Approach to Value

The most appropriate approach to value is the market value approach, which compares the item to similar items available at the Retail Jewelry Store.

Assumptions and Limiting Conditions

This Certificate of Appraisal is given subject to the terms and conditions hereafter set forth, all of which are here unless expressly set aside in writing either on the pages of the Certificate or by a writing attached to the Certificate signed by all parties concerned.

- 1 Unless otherwise stated therein, the appraised value(s) is (are) based on the whole ownership and possessor interest undiminished by any liens, fractional interests or any other form of encumbrance or alienation.
2. This certificate is made at the request of the party named for his or her use. It is not an indication or certificate of title or ownership. The identification of the interest of the requesting party is simply that represented to the appraiser by such party and no inquiry or investigation has been made nor is any opinion given as the truth of such representation.
3. The value(s) expressed herein is (are) based on the appraiser's best judgment and opinion and is (are) not a representation of warranty that the item(s) will realize that value if offers for sale at auction or otherwise. The value(s) expressed is (are) based on current information on the date made and no opinion is hereby expressed as to any future or past value(s), unless otherwise expressly stated.
4. Stated value(s) is (are) given item by item unless clearly stated as being per lot. The total of individual item values shall not be constructed as an appraisal value of the whole lot but merely as the addition of single values. Were values are given by lot, the value per lot is for the whole and no opinion is given as to the individual proportional values with the lot.
5. Unless otherwise stated herein, the value (s) expressed is (are) based on the general expertise and qualifications of the appraiser as to the appropriate markers and valuations of the item(s) and purpose and function involved. Where particular detailed valuation information is relied on, it will be stated in writing.
6. Where an appraisal is based on a sample of a larger whole, it will be so stated. The value will be based on the assumption that the sample (s) delivered is (are) representative and fair. No opinion or warranty is here by made as to the fairness or representative nature of any large whole from which the same was drawn.
7. Where an appraisal is based not only on the item(s), but also on data or documentation supplied therewith, the appraiser shall so state by making reference thereto, and, where appropriate, attaching copies of such documentation hereto.
8. Unless expressly stated, the condition of the item(s) is (are) good for its type, with serious deficiencies and repairs noted. Ordinary wear and tear common to this type of item(s) is (are) not noted.
9. Possession of the report, or copy thereof, does not include the right of publication without the written consent of the appraiser. This report in its entirety, or any part hereof, including the identity of the appraiser, or his firm, shall not be made public through advertising, public relations, sales, or other distribution or information media without the written consent of the appraiser
10. No changes to this report may be made by anyone other than the appraiser whose signature is appended to the report. If such changes are made, the signed appraiser is not responsible for the same.
11. Diamonds and gemstones have become increasingly difficult to identify as natural, treated, assembled or synthetic. All diamonds and most gemstones are potentially subject to treatments that vary from easy to highly difficult to detect. Currently, few appraisers and small gem labs have any of the equipment which screens out diamonds and gemstones for more advanced testing. Those which would be screened out need to go to major laboratories for definitive scientific examination which requires costly equipment operated by highly trained experts. **Consumers should obtain proper paperwork from the retailer selling them a diamond or gemstone which reports the natural or other origin of the major stones along with revelation of any treatments present.** This is beyond the scope of what most independent appraisers can provide to their clients. Appraisers always make some assumptions to produce reports but now, in 2015, we need to make assumptions of importance on virtually every diamond and most gemstones. Since every report is a different situation, it is up to the appraiser to determine what assumptions should be stated on the report. Your appraiser will discuss this subject with you in order to formulate the correct set of assumptions based on the evidence and history of the diamonds or gemstones which are being evaluated.
